KAMEMOTO ET AL. -- 09/863,515  
Attorney Docket No.: 008312-0280271

- Amendment -

## IN THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (*Currently Amended*) A digital broadcast receiver ~~which~~ that receives digital broadcast data ~~and includes, comprising:~~

control means ~~that reproduces~~ configured to reproduce the digital broadcast data ~~on the basis of~~ based on contract information recorded on a memory card plugged into a card slot, wherein a memory for data storage is built into the memory card, and

an interface means, ~~for being~~ added to the control means, ~~which obtains~~ configured to obtain program selecting data contained in the received digital broadcast data and ~~writes to record~~ the program selecting data received digital broadcast data into the memory ~~in~~ of the memory card plugged into the card slot.

2. (*Currently Amended*) The digital broadcast receiver according to claim 1, wherein the interface means obtains adjustment data for each unit in the digital broadcast receiver and ~~writes~~ records the adjustment data ~~received digital broadcast data~~ into the memory ~~in~~ of the memory card plugged into the card slot.

3. (*Currently Amended*) The digital broadcast receiver according to claim 1, wherein the interface means obtains data broadcast received data contained in the received digital broadcast data and ~~writes~~ records the data broadcast received data ~~the received digital broadcast data~~ into the memory ~~in~~ of the memory card plugged into the card slot.

4. (*Cancelled*).

KAMEMOTO ET AL. -- 09/863,515  
Attorney Docket No.: 008312-0280271

- Amendment -

5. (*Currently Amended*) A digital broadcast receiver ~~which~~ that receives digital broadcast data ~~and includes, comprising:~~

a control section ~~that reproduces~~ configured to reproduce the digital broadcast data based on the basis of contract information recorded on a memory card plugged into a card slot, wherein a memory for data storage is built into the memory card, and

an interface section, ~~is added to the control section, which obtains~~ configured to obtain program selecting data contained in the received digital broadcast data and writes to record the program selecting data ~~received digital broadcast data~~ into the memory ~~in of~~ the memory card plugged into the card slot.

6. - 10. (*Cancelled*).

11. (*Currently Amended*) A digital broadcast receiver system ~~which~~ that receives digital broadcast data ~~and includes, comprising:~~

control means ~~that reproduces~~ having the capability of being remotely controlled and configured to reproduce the digital broadcast data based on the basis of contract information recorded on a memory card plugged into a card slot ~~and which is adapted to be remotely controlled by a remote controller~~, wherein the memory card has a memory for data storage built in, ~~the control means includes ;~~

interface means ~~which obtains~~ configured to obtain program selecting data contained in the received digital broadcast data and writes to record the program selecting data ~~received digital broadcast data~~ into the memory in the memory card plugged into the card slot, ; and ~~the~~

a remote controller configured to remotely operate the control means. the remote controller being is equipped with operating members, a display unit, and a card slot and,

wherein when the memory card is plugged into ~~it's~~ the card slot, the remote controller reproduces the program selecting data recorded on the memory and displays the program selecting data on the display unit, and sends program select information to

 Attorney Docket No.: 008312-0280271

- Amendment -

~~the digital broadcast receiver selected on the basis of~~ based on the contents displayed  
~~display on the display unit to the digital broadcast receiver.~~

12. (Currently Amended) A digital broadcast receiver system ~~which~~ that  
 receives digital broadcast data ~~and includes, comprising:~~

~~control section that reproduces~~ having the capability of being remotely  
controlled and configured to reproduce the digital broadcast data ~~on the basis of~~ based  
on contract information recorded on a memory card plugged into a card slot ~~and which~~  
~~is adapted to be remotely controlled by a remote controller,~~ wherein the memory card  
 has a memory for data storage built in, ~~the control section includes~~

an interface section which obtains configured to obtain program selecting data  
 contained in the received digital broadcast data and ~~writes to record the program~~  
selecting data received digital broadcast data into the memory ~~in~~ of the memory card  
 plugged into the card slot; ~~and the~~

a remote controller configured to remotely operate the control means. the  
remote controller being is equipped with operating members, a display unit, and a card  
 slot and,

wherein when the memory card is plugged into ~~it's~~ the card slot, the remote  
controller reproduces the program selecting data recorded on the memory and displays  
 the program selecting data on the display unit, and sends program select information  
 selected ~~on the basis of~~ based on the contents display displayed on the display unit to  
 the digital broadcast receiver.

13. (Currently Amended) A method of controlling a digital broadcast receiver,  
 adapted to be remotely controlled by means of a remote controller, so that received  
 digital broadcast data is reproduced ~~on the basis of~~ based on contract information  
 recorded on a memory card plugged into a card slot, the method comprising:

~~a recording step of~~ obtaining program selecting data contained in the received  
 digital broadcast data; and

~~writing~~ storing the program selecting data into a memory ~~for data storage~~ built  
~~in~~ into the memory card plugged into the card slot;

KAMEMOTO ET AL. -- 09/863,515  
Attorney Docket No.: 008312-0280271

- Amendment -

~~a display step of plugging the memory card having its memory recorded with the stored program selecting data into a card slot provided in the remote controller;~~  
reproducing the program selecting data recorded stored on the memory card;  
and

displaying the program selecting data on a display unit provided in the remote controller; and

~~a transmit step of sending transmitting program select information selected from the displayed contents displayed on the display unit of the remote controller to the digital broadcast receiver on the basis of based on an operation of the operating members of the remote controller to the digital broadcast receiver.~~

14. - 15. (Cancelled)

16. (Currently Amended) A remote controller for remotely operating a digital broadcast receiver ~~by remote control~~ which receives digital broadcast data and performs reproduction processing on the digital broadcast data ~~on the basis of~~ based on contract information recorded on a memory card ~~plugged into a card slot, wherein the remote controller comprising:~~

~~the memory card has a memory for data storage built in and, when plugged into the card slot, allows program selecting data contained in the received digital broadcast data to be written into the memory; and~~

~~the remote controller has operating members; ;~~

a display unit; ; and

a card slot configured to receive the memory card, the memory card having internal memory that stores program selecting data contained in the received digital broadcast data,

wherein when the memory card is plugged into ~~it's the~~ card slot, the remote controller reproduces the program selecting data recorded ~~on in~~ the memory card, and displays the program selecting data on the display unit, and sends program select information ~~to the digital broadcast receiver selected on the basis of~~ based on the contents ~~display displayed~~ on the display unit ~~to the digital broadcast receiver.~~

Attorney Docket No.: 008312-0280271

- Amendment -

17. (*Currently Amended*) A method of controlling a digital broadcast receiver ~~by means of~~ via a remote controller so as to reproduce received digital broadcast data ~~on the basis of~~ based on contract information recorded on a memory card plugged into a card slot, the method comprising:

~~a display step of, reproducing program selecting data contained in the received digital broadcast data that is recorded on the memory card when the memory card having program selecting data contained in the received digital broadcast data written into its built-in memory for data storage is plugged into a card slot of the remote controller;~~ reproducing the program selecting data recorded on the memory card, and

displaying the program selecting data on a display unit provided in the remote controller; and

~~a transmit step of sending transmitting~~ program select information selected from the displayed contents on the display unit of the remote controller to the digital broadcast receiver on the basis of based on an operation of the operating members of the remote controller ~~to the digital broadcast receiver.~~

18. - 19. (*Cancelled*).

20. (*Currently Amended*) A remote controller which operates ~~a remote controller so as~~ to reproduce received digital broadcast data ~~on the basis of~~ based on contract information recorded on a memory card, comprising: wherein it is equipped with

a plurality of operating members;

a display unit; and

a card slot and has functions of,

wherein when the memory card having program selecting data contained in the received digital broadcast data written into its built-in memory for data storage is plugged into the card slot, the remote controller functions to reproducing reproduce the program selecting data recorded on the memory of the memory card, displaying displays the program selecting data on the display unit, and sending transmits program

- Amendment -

select information selected from the displayed contents on the display unit to the digital  
broadcast receiver on the basis of based on an operation of the operating members ~~to~~  
~~the digital broadcast receiver.~~
